Comprehensive Solutions For Your Audio/Video and Broadcasting Needs.

Digital Video Group, Inc. is an industry leading supplier and system integrator of broadcast and production systems. We work with leading industry manufacturers and service customers ranging from the DOD, and Federal Civilian Agencies to television stations, industrial, education, and state & local government. Our services range from system design and consulting to installation, support, and training. Our technicians are factory certified and trained to manufacturer standards. We provide a range of goods and services to meet every need and budget!

Highlighted Projects

AFN Radio System Upgrade (2022):

Customer: Defense Media Activity

We upgraded the existing AFN Worldwide Radio network for the US Military by installing a modular Audio over IP Router System (AoIPRS) with Studio Consoles.

Broadcast TV Production System Upgrade (2020):

Customer: Library of Congress

As part of a comprehensive, multi-phased upgrade to the Library's production system, we provided installation and support of a HD/UHD capable video router to support HD signals, with future capability to support 12G-SDI UHD signals.

Broadcast Insert TV Studio (2020)

Customer: Department of Homeland Security

We provided design, engineering, and installation services for a single camera broadcast studio for use to interact with broadcast outlets.
